

Seeks long-term growth of capital through exposure to companies primarily in the U.S. with strong growth potential

Figures shown are past results for Class F-2 shares with all distributions reinvested and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Results and data shown for the model portfolio are based on the current underlying fund allocations, rebalanced monthly. For model portfolio results that reflect changes, if any, to the underlying fund allocations over its lifetime, see page 2.

10-year equity range: 89.9%–96.2%

10-year standard deviation¹: 13.92%

30-day yield²: 0.43%

Broadly diversified³

Asset mix (12/31/20)

Total may not add up to 100% due to rounding.

The model portfolio includes stocks from **1,303 companies** and bonds from **3 issuers** (as of 12/31/20).

Current equity percentage: 96.2%

Monitored by an experienced team

This model portfolio is overseen by the Portfolio Solutions Committee, a group of managers that collectively have decades of investment industry experience. The committee actively monitors the model portfolios using an objective-based, bottom-up process that includes rigorous analysis of the underlying funds.

Competitively low expenses⁴

Weighted average expense ratios

Proven results⁵

Hypothetical \$100,000 investment
Ending value for 10 years ended 12/31/20

\$369,692

Model portfolio

Over rolling 10-year periods, the model portfolio has:

- Outpaced its index blend 100% of the time.
- Had an up capture ratio of 105% and a down capture ratio of 91%.

Of course, there have been periods when the model portfolio has lagged the index blend.

Careful construction at a glance

10% SMALLCAP World Fund®: Invests in some of the fastest growing and most innovative companies in the world.

10% The New Economy Fund®: Seeks companies that can benefit from innovation, exploit new technologies or provide products/services to meet the demands of an evolving global economy.

25% The Growth Fund of America®: Invests primarily in traditional U.S. growth companies; geographic flexibility to pursue industry leaders and attractive opportunities outside the U.S.

10% New Perspective Fund®: Invests primarily in multinational companies with a meaningful share of their sales and operations outside their home countries.

25% AMCAP Fund®: Invests in companies of any size that have solid long-term growth records and attractive future growth potential.

20% Fundamental Investors®: Emphasizes growth over income; seeks undervalued and overlooked opportunities.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Results as of December 31, 2020

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. Model investment results assume monthly rebalancing. Expense ratios for the model are weighted averages of the underlying funds as of the most recent prospectus. Expense ratios for the underlying funds are as of the most recent prospectus. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which the results would have been lower. Please see capitalgroup.com for more information. Class F-2 shares were first offered on 8/1/08. Class F-2 share results prior to the date of first sale are hypothetical based on results of the original share class of the fund without a sales charge, adjusted for typical estimated expenses. Results for certain funds with an inception date after 8/1/08 also include hypothetical returns because those funds' Class F-2 shares sold after the funds' date of first offering. Please see capitalgroup.com for more information on specific expense adjustments and the actual dates of first sale.

Actual model allocations results reflect changes, if any, in the underlying fund allocations over the model's lifetime, rebalanced monthly; lifetime results are since 5/9/11, the launch of the model portfolio. **Current model allocations** results are based on the current underlying fund allocations, rebalanced monthly; lifetime results are since the model's youngest underlying fund's inception date.

Portfolios are actively monitored; allocations and funds may change.

¹ Annualized standard deviation is calculated at net asset value based on monthly returns and is a measure of how returns over time have varied from the mean. A lower number signifies lower volatility.

² Yield is the weighted average of the underlying funds' annualized 30-day SEC yields at NAV. The 30-day SEC yield reflects the rate at which the fund is earning income on its current portfolio of securities.

³ Holdings are weighted averages of the model portfolio's underlying funds. Portfolios are managed, so holdings will change.

⁴ Source for industry average expense ratios: Lipper, based on institutional load funds, excluding funds of funds. The industry average expense ratio is a weighted average of the underlying funds' Lipper averages as of the most recent fiscal year-ends available as of 12/31/20: Global Small-/Mid-Cap (SMCFX); Global (ANWFX and NEFFX); Large-Cap Growth (GFFFX); and Growth & Income (FINFX).

⁵ Hypothetical results assume all distributions are reinvested and rebalanced monthly. Rolling periods for these stats are calculated on a monthly basis, beginning 4/30/90, the inception of the youngest underlying fund – SMALLCAP World Fund. Up (down) capture ratio is the ratio of a model's return during periods when the index blend was up (down), divided by the return of the index blend during those periods. For example, an up-capture ratio greater than 100 indicates the model produced a higher return than the index blend during periods when the index blend was up. Conversely, during periods when the index blend was down, a down-capture ratio greater than 100 indicates the model produced a lower return than the index blend. The index blend is 70% Standard & Poor's 500 (S&P 500)/30% MSCI All Country World Index (ACWI) ex USA through 6/29/20, and 100% S&P 500 thereafter. S&P 500 is a market capitalization-weighted index based on the results of approximately 500 widely held common stocks. MSCI ACWI ex USA measures stock market results of more than 40 developed and developing country markets, excluding the U.S. Results reflect dividends gross of withholding taxes through 12/31/00, and dividends net of withholding taxes thereafter. The indexes are unmanaged, and their results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes. Investors cannot invest directly in an index.

⁶ Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

⁷ Since 4/30/90, the inception date for SMALLCAP World Fund, the model's youngest underlying fund.

Allocations may not achieve investment objectives. The portfolio's risks are directly related to the risks of the underlying funds, as described below. There are expenses associated with the underlying funds in addition to any fees charged by the intermediary. Additionally, the intermediary includes cash allocations in the model, which are not reflected here.

Investing outside the United States involves risks such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks.
